## EDUCATION

<b>The University of Texas at Austin</b>	Bachelor of Science, Computer Science	May 2016
	GPA: 3.25	
<b>Related coursework:</b>		
Operating Systems	Object Oriented Programming*	Probability
Computer Architecture	Mobile Computing*	Linear Algebra
Data Structures	Algorithms*	
Introduction to Programming	Logic, Sets, and Functions	
		*—Currently enrolled

## EXPERIENCE

<b>Adore.ly</b> — Backend Engineer; <i>Austin, TX</i>	Summer 2014 — Present
<i>Developer on the backend team, which was responsible for data management, managing REST API endpoints, and user authentication</i>	
<ul style="list-style-type: none"><li>•Collaborated with UT Computer Engineering Professor Sriram Vishwanath on a local startup</li><li>•Integrated endpoint functionality such as login, sign-up, change password, OAuth, etc.</li><li>•Parsed large XML feeds for information and converted them into JSON objects for front-end development</li><li>•Unit-tested code for various functionalities, such as endpoints, email scraping, and emailing</li></ul>	
<b>Applied Research Laboratories</b> — Software Developer; <i>Austin, TX</i>	Spring 2014 — Summer 2014
<i>Part of the ITS team that managed database jobs which changed daily depending on user requests</i>	
<ul style="list-style-type: none"><li>•Programmed SQL to query laboratory data which was used for data analysis</li><li>•Examined and tested fellow peers' code for proper functionality</li><li>•Wrote shell scripts to automate program execution which completed daily tasks</li><li>•Analyzed peer code and fine tuned it to work with laboratory requests</li></ul>	

## SOFTWARE PROJECTS

<b>The Classy Coder</b> — Java/Android	Summer 2014
<ul style="list-style-type: none"><li>•Designed as a personal summer project to learn Android development using the Android SDK</li><li>•Programmed to send SMS messages using Android's SmsManager class to a number containing a coding pun</li><li>•Included with a subscription function which utilizes Android's PendingIntent to send a SMS twice a day</li></ul>	
<b>Facebook UT Buy/Sell/Trade/Free Macbook Scanner</b> — Python	Summer 2014
<ul style="list-style-type: none"><li>•Automated Heroku bot which scans through UT's Buy/Sell/Trade/Free page and sends a Facebook message daily</li><li>•Integrated with Twilio's REST API to send a SMS message to a specific person day</li></ul>	
<b>Reddit's NBA Negative Karma Bot</b> — Python	Summer 2014
<ul style="list-style-type: none"><li>•Designed as a personal summer project in honor of the NBA 2014 Playoffs</li><li>•Used the PRAW API to pull comments of top NBA submissions which had less than or equal to -10 points</li><li>•Automated with Heroku to send private messages to the users warning them of their crime</li></ul>	
<b>The Animal Farm</b> — Python/Web	Spring 2014
<ul style="list-style-type: none"><li>•Developed a web application aimed towards supporting anonymous serious online debate</li><li>•Programmed the backend using SQLite3 and Flask's micro framework API</li><li>•Collaborated with three other teammates to develop at HackRice 2014 over the course of 24 hours</li></ul>	
<b>PDP-8</b> — C	Fall 2013
<ul style="list-style-type: none"><li>•Implemented a PDP-8, incorporating specific instructions including memory reference and I/O</li><li>•Extended the PDP-8 towards a 16-bit architecture, using four registers and gaining exposure to architecture</li></ul>	
<b>Huffman Coding</b> — Java	Spring 2013
<ul style="list-style-type: none"><li>•Supported a program which used the Huffman Coding Algorithm for lossless compression</li><li>•Designed to allow compression and decompression of HTML, JPEG, and plain text files</li></ul>	

## TECHNICAL SKILLS

- Proficient in Java
- Programmed with C and Python
- Comfortable with software such as Git, GDB, Eclipse, vim, MongoDB, Elasticsearch, noSQL, Django, Flask
- Exposure/Experience with Ruby, Javascript, AngularJS, HTML, SQL, Android Mobile Development, Web Development
